1. What strikes you the most about the history?
 - a. I was surprised at how nostalgic and beautiful Cameronsworld is. When I look at that page I realized that I miss those kinds of artistic websites and I am tired of minimalist websites.
2. What happens if you add href=#id-name to an anchor tag?
 - a. It creates a hyperlink.
3. What is the difference between the following links:
src = "images/phone.png" & src = "/images/phone.png"
 - a. The link with a forward slash is a relative link outside the folder whereas the one without is in the same folder.
4. What happens if you add aria-hidden=true to an HTML element?
 - a. It hides parts of your code from the screen reader. It's best used for elements that the screen reader would have trouble reading.
5. (live site) <https://kimmyice-png.github.io/art-109/tutorials/02-html/>
 - a. (GitHub website) <https://github.com/kimmyice-png/art-109>
